

Innovation just comes natural!

April Q2

Staying up to date in an industry that constantly fluctuates isn't easy, but being aware of the shifts in trends as they happen can keep you ahead of the curve. To help stay informed and on top with industry trends, check out our latest innovations!

HDF Doors - With the growing popularity of HDF, BJ Tidwell Cabinetry has decided to begin producing its Shaker and Sussex FP and RP door styles—in both Full and Standard overlay, in HDF material. We know that many in this industry have certain preferences and we strive to meet them.

HDF material is similar, but much harder and denser than MDF, and offers a more seamless look than painted solid wood. It also comes with the added benefit of having the durability to stand up to changes in heat or humidity which helps to maintain the integrity of the finish. Our goal is to offer only the best in quality when it comes to our products.

RD Codes (Replacement Doors) - Here at BJ Tidwell Cabinetry, we strive for continuous improvement with every product, project and process. Keeping our customer's needs in mind, we have revamped our replacement door/drawer front ordering process, to make it more efficient and easier to order.

In order to simplify our door ordering process, we will be introducing RD Codes. Instead of inputting door size when ordering replacement doors or drawer fronts, you will now use an RD code, for example:

7 1/2 X 10 1/8 (Standard Overlay) and 8 5/8 X 11 1/4 (Full Overlay) are now RD0912

Innovation just comes natural!

Each type of wood has its own characteristic color and grain pattern, and the color also can be altered with stain. Please note, photography shown is for illustration purposes only and actual colors may vary. For true representation of Dusk, a sample must be ordered.

At the end of the day just before it becomes dark -

DUSK

BJ Tidwell Cabinetry is thrilled to welcome a new stain inspired by beauty of nature. Shown here in Urban II, Newport II and Shaker II, this elegant coloring combines the richness of woodgrain and enhances it with a stunning mix of gray hues—a perfect addition to our already vast color palette!
