Overlay Information:

Standard Overlay

Standard Overlay door styles have a 3/4" reveal left and right and 15/16" top and bottom. 3/4" in between the doors and drawer fronts so no hardware pulls are required.

Mitered

A joint made by beveling each of two surfaces to be joined, usually at a 45° angle, to form a corner, usually a 90° angle.

Full Overlay

Full Overlay door styles offer a minimal gap between the door and drawer front, as well as cover the face frame producing a 3/16" reveal. Door and drawer hardware pulls are required.

Mortise & Tenon

Mortise & Tenon joint is made by inserting a mortise on one piece into a tenon in the other.

Wood Species Information:

Grain

Grain is the texture seen in cut wood. Door panel grain runs vertical, while drawer front grain runs horizontal.

Beech

Beech is a heavy, pale-colored medium to hard wood. It has a fine grain and medullary rays, similar in appearance to maple or birch woods. Beech wood has a high shock resistance and takes stains well.

Cherry

Cherry is a fine textured, strong and fairly durable wood and is well known for becoming darker and richer with age. While fairly pale when freshly cut, the end result is a favored reddish brown with a golden luster hue.

Knotty Alder

Knotty Alder features a color range of light brown with reddish or peach hues. With soft, straight grain and even texture, its characteristic also includes small and large split knots and open knots that vary in size, shape, and color.

Maple

Maple is a close grained wood that is generally straight, but may be wavy in some instances. Its color ranges from nearly white, to an off-white cream color, sometimes with a reddish or golden hue.

Oak

Oak features medium-to-large pores and a fairly coarse grain. Oak wood has a light to medium reddish-brown color that sometimes is streaked with mineral deposits and may vary from a close knot grain to sweeping arch pattern.

HDF

HDF consists of a hard wood or wood-type center that offers a smooth and uniform surface ideal for solid color finishing.. The advantage of using HDF vs. wood in the core again points to the moisture-resistant nature of fiberboard.

To better serve our customers need, Tidwell Cabinetry offers custom cabinetry known as a "Per Drawing".

Anytime a specialty cabinet is requested, we ask that you follow these few simple guidelines to help expedite the process, and ensure that it is done correctly and in a timely manner.

PER DRAWING GUIDELINES

PER DRAWING REQUEST: Complete per drawing request form and submit to your CS Rep. Please ensure that form is filled out properly, as any missing information will delay process.

QUOTE: Price is quoted and returned to you via e-mail/fax - Once this is done, your request is on hold until a preliminary drawing is requested.

PRELIMINARY DRAWING: Once requested, a preliminary drawing is done to confirm cabinet design, style, color and construction. If corrections are necessary, please mark and return drawing to your CS Rep

APPROVAL: To approve, please sign and date the preliminary drawing and return to above e-mail/fax. Please note, shop drawings will not be created until the preliminary drawing is signed and returned.

PRODUCTION: Once your approval is received, it is forwarded to your Customer Service Rep. A drawing number will be assigned and we can begin shop drawings and specifications for our system.

Since a "Per Drawing" cabinet is not run thru our standard manufacturing process, we require at least 2 business days from the time the original request is sent in before item can be placed into production.

Also, Per Drawings are manually built, they are NOT available in Rush.
