Material Information:

Maple

Maple is a close grained wood that is generally straight, but may be wavy in some instances. Its color ranges from nearly white, to an off-white cream color, sometimes with a reddish or golden hue.

Oak

Oak features medium-to-large pores and a fairly coarse grain. Oak wood has a light to medium reddish-brown color that sometimes is streaked with mineral deposits and may vary from a close knot grain to sweeping arch pattern.

HDF

HDF consist of a hard wood or wood-type center that offers a smooth and uniform surface ideal for solid color finishing.. The advantage of using HDF vs. wood in the core again points to the moisture-resistant nature of fiberboard.

Acrylic

Impeccable surface consistency, scratch resistant high gloss surface and color richness that enhances depth and clarity.

Echo

Reconstituted real wood veneer provides endless opportunities to create the look of rare and common wood. This environmentally responsible alternative is an architectural veneer that is consistent in color and grain, time and time again.

Textured Melamine

Colorful textured melamine that has character with a designer-friendly focus. Authentic to the touch, with the benefits of value and durability, it's a smart surface that you can love.
